### DirtBag, Inc. Battles Dust in the Middle East

DirtBag, Inc. is doing its share to assist our overseas military with its recent delivery of 6800 PC Dirt Bags to the United States Air Force. These innovative computer dust covers can now be found on computers on every air base in the Middle East. DirtBag, Inc. uses patented technology in a special filter designed to protect computers from airborne dust, dirt, and grime—a perfect solution for the sandstorm environments in the Middle East. Installed in less than five minutes and lasting up to nine months, the Dirt Bag computer filter purifies all incoming air, preventing costly maintenance by protecting the computer's power supply, motherboard, and disk drives. For more information, go to [www.dirtbag.biz](http://www.dirtbag.biz).
